

# E-Mail Earnings Statements

for Microsoft Dynamics® GP 9.0 and 10.0\*\*

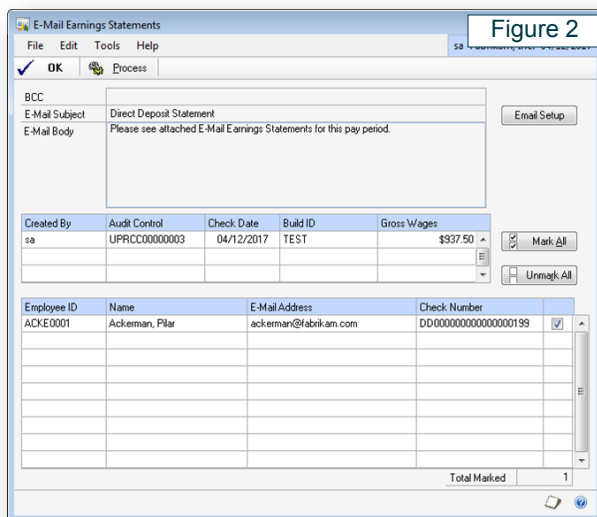

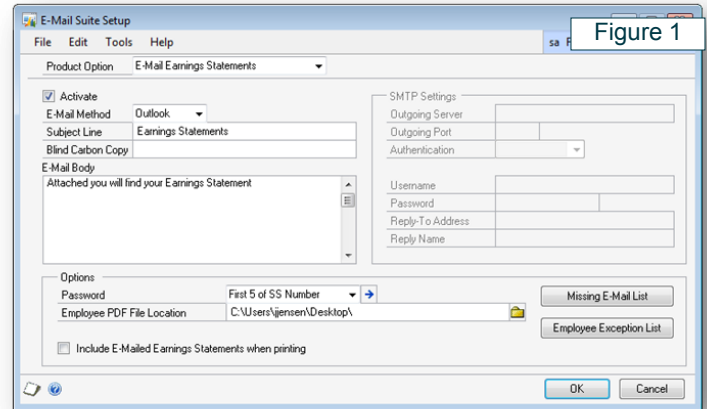

Automatically E-mail Direct Deposit Earnings Statements from Microsoft Dynamics® GP

## Do your employees want to receive their earnings statements via e-mail?

Would it be helpful if you had the ability to automatically e-mail direct deposit earnings statements to your employees from Microsoft Dynamics® GP?

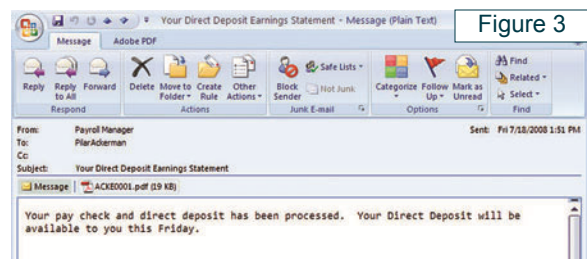

## Do you want to improve employee communication?

Would you like to be able to attach company newsletters and information in the body of your earnings statements e-mails, thereby improving employee morale and retention? Would it also benefit you if the employees who did not have a valid e-mail address or do not wish to receive e-mail earnings statements could be added to an exception list that you are able to review? (See Figure 1)

## How much time do you spend preparing and delivering employee pay stubs?

Would it be valuable to you to be able to delay sending of e-mail earnings statements? This would give you the opportunity to process payroll earlier in the week and have earnings statements e-mailed at the end of the week. (See Figure 2)

## System Requirements:

1. Microsoft Dynamics® GP Payroll
2. Direct Deposit registered and setup
3. Adobe Acrobat version 8 or 9 installed on the machine processing E-Mail Earnings Statements
4. Outlook 2003, Outlook 2007, or SMTP Server
5. .NET Framework 3.5

## Do you want to improve employee satisfaction?

Would it be beneficial to your employees to be able to view their direct deposit earnings statements as an encrypted Adobe PDF document within their e-mail inbox, all without having to log onto a web portal? (See Figure 3)
