

# Mid Pay Period Rate Changes

for Microsoft Dynamics® GP 10.0 and 2010\*\*

## Manage Pay Rate Effective Dates in Microsoft Dynamics® GP Payroll

### Do you need pay rate changes to be effective in the middle of a pay period?

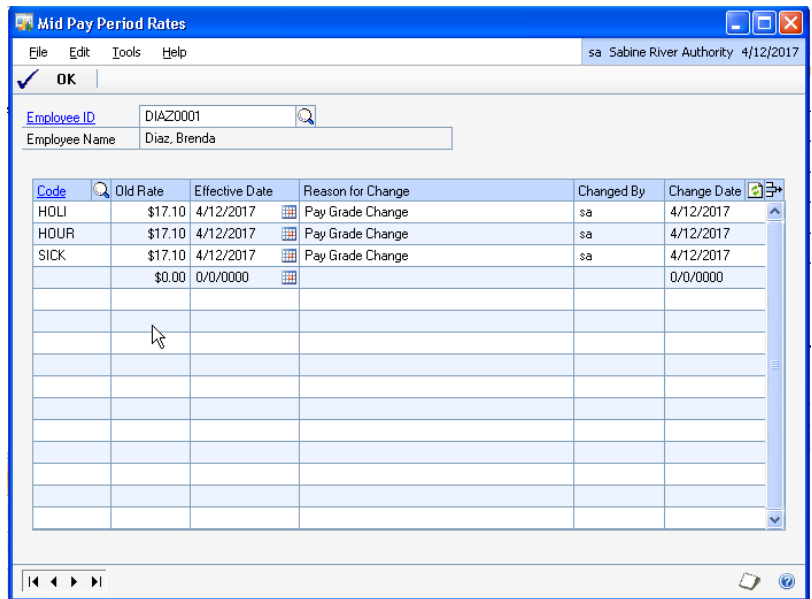

Would it be beneficial if your system could recognize the effective date of a pay rate change even if that change is in the middle of a pay period?

### Are you looking to capture information when a rate change occurs?

Would it be helpful if that information was stored for later use during a pay run, where you are able to edit it and make changes prior to being applied?

Pay rate changes are implemented on their effective date for hourly and salary employees when their pay is updated via:

- Employee Pay Code Maintenance
- Pay Grade Step Changes
- Compensation Management
- Post Dated Pay Rates
- Mass Updates

Code	Old Rate	Effective Date	Reason for Change	Changed By	Change Date
HOLI	\$17.10	4/12/2017	Pay Grade Change	sa	4/12/2017
HOUR	\$17.10	4/12/2017	Pay Grade Change	sa	4/12/2017
SICK	\$17.10	4/12/2017	Pay Grade Change	sa	4/12/2017
	\$0.00	0/0/0000			0/0/0000

Would it be helpful if your system automatically adjusted payroll transactions in the payroll build? Payroll transactions occurring after the pay rate change reflect the new rate. Payroll transactions occurring before the pay rate change reflect the old pay rate.
