INTEGRITY DATA HRP FOR MICROSOFT DYNAMICS 365 BUSINESS CENTRAL SAVES EXTRUSIONS

8+HOURS

EVERY WEEK ON PAYROLL, IMPROVES ACCURACY, AND DELIVERS A FAST ROI. LEGACY SYSTEM CAUSED NUMEROUS PAYROLL AND HR CHALLENGES, BOTTLENECKS, AND FRUSTRATIONS.

For Lisa Clark, Controller, and Tracy Smith, EH&S Supervisor, payroll and HR for Extrusion's 150 employees is a labor of love they share with their other company responsibilities. Time is valuable so it was frustrating for payroll alone to take 8 hours or more to complete every week due to an inflexible and inefficient system.

"If there was just one mistake, we couldn't reverse anything in the system. We had to manually void every check and start over from scratch," says Tracy. "Rate of pay and benefits calculations were often off with no rhyme or reason to the issue. So I spent hours reviewing data after each payroll run because we just couldn't trust the integrity or accuracy of the data."

Extrusions had numerous challenges with their legacy system and made the decision to upgrade to Microsoft Dynamics 365 Business Central. "We knew keeping our payroll in-house would be a big part of our decision on which system to choose, and our Microsoft partner highly recommended Integrity Data HRP, formerly Payroll NOW," Lisa explained. "Integrity Data HRP integrates seamlessly with Business Central and would automate so many things we were doing manually. It had a lot of features we were excited about."

The Integrity Data team worked with Extrusions and their partner to implement Integrity Data HRP for Business Central even faster than expected. Tracy was a bit nervous going in but gained confidence quickly, "Training was awesome and they taught us helpful best practices along the way. Though we were essentially starting from scratch, the system is very user-friendly so we were able to take off running after just a few weeks."

About Extrusions, Inc.

Extrusions, Inc. is a full-service aluminum extruder providing a large inventory of stock dies and custom shapes for all types of aluminum products. In business since 1962, the company is based in Fort Scott, KS, with approximately 150 experienced employees serving customers' unique needs for quality products and personal service.

"As a growing company, Integrity Data HRP for Business Central is designed to grow with us and has given us the best of both worlds. We are able to keep full control of our payroll in-house with a system that makes it just as easy and efficient as outsourcing to a payroll service. It is an excellent HR and payroll solution for any company, no matter how big or small."

Lisa Clark, Controller
Extrusions, Inc.

Weekly Payroll Reduced from 8 Hours to 45 Minutes

Integrity Data HRP for Business Central is fully optimized to help busy payroll professionals automate processes and eliminate manual work and errors. For Tracy and Lisa, saving a full day every week on payroll is a game-changer. Less time on payroll and HR tasks means more time to focus on their primary responsibilities for the business.

Automated Quarterly 941s in 5 Minutes

Preparing quarterly payroll reports was previously a manual process taking 8-12 hours and now only takes 5 minutes tops. Integrity Data HRP for Business Central automatically captures necessary data and generates reports to save time, increase accuracy, and minimize compliance risks.

Enhanced Reporting and Analytics

With Integrity Data HRP for Business Central, all payroll data—including wages, taxes, insurance, contributions, etc.—is automatically posted to Jobs in Business Central. This provides Extrusions with true job costs and insights they couldn't get before. Lisa also appreciates the enhanced reporting capabilities, "If I want a report, it's out there."

Improved Security and Accessibility

With cloud-based Integrity Data HRP for Business Central, Extrusions has the peace of mind their data is more secure while providing easier access from any location or device. "We can upload notes and attachments for employees to handle accident claims or medical expenses without worrying that someone can get into our system. This has greatly reduced our paper files and, in just a couple of clicks, we can get the answers and information we need in the system," says Tracy.

Ongoing Support and Trust

Integrity Data is committed to help Extrusions continue getting the most value from their investment in Integrity Data HRP for Business Central. "If we pose a question, their team figures out a way to make it happen. They have been very flexible and truly understand how to help businesses simplify all aspects of payroll and HR."
