

PN Granting Permissions to HR Connection

SUMMARY: This article will show the user how to allow additional permissions to their HR Next Integration.

1. Navigate in Business Central to the Search button

2. Search for Permission Set

3. Create a New Permission set, with a name of PN Additional

4. Once created, click the ellipse to the right of the permission set, and select Permissions

5. Down in the Permissions section, click on the Object ID cell, then click on the ellipse button

Type	Object Type	Object ID	Object Name
→ Include	Table Data	...	All objects of type Table Data

Choose a value for Object ID

6. This will bring up a lookup screen, one by one, search for each of the tables below and select OK

Select object to add

IDPN Payroll Empl

Type	ID	Object Name	Object Subtype
→ TableData	70291078	IDPN Payroll Employee	Normal
TableData	70291091	IDPN Payroll Employee Salary	Normal

OK Cancel

- a. IDPN Payroll Employee
- b. IDPN Payroll Code
- c. IDPN Payroll Ledger Entry

7. After selecting each table, the UI should have all tables listed

General

Permission Set: PN ADDITIONAL

Permissions: Manage Allow Read Allow Insert Allow Modify Allow Delete Allow Execute Allow All

New Line Delete Line Select Objects... Add Read Permission to Related Tables

Type	Object Type	Object ID	Object Name	Object Caption	Read Permission
→ Include	Table Data	70291078	IDPN Payroll Employee	Payroll Employee	Yes
Include	Table Data	70291081	IDPN Payroll Code	Payroll Code	Yes
Include	Table Data	70291084	IDPN Payroll Ledger Entry	Payroll Ledger Entry	Yes

8. You may close the Permission Set window
9. Open the search again, and search for Microsoft Entra

Tell me what you want to do

Microsoft Entra

Go to Pages and Tasks

> Microsoft Entra Applications Administration

10. Once inside the Microsoft Entra window, select the HR Next Connection (the name will vary depending on setup)

Microsoft Entra Applications

Search Analyze + New Manage

Client ID	Description	State
{af30e371-ad4a-4097-88c1-5555e7ada96f}	Dynamics 365 Business Central for Virtual T...	Disabled
{757450ce-93ca-4ed3-8916-5ddc3c5f834a}	HR Next Connection	Enabled

11. This will open a subsequent window, which will allow you to select the PN Additional Permission set we just created

User Permission Sets | New Line Delete Line Permissions

Permission Set ↑	Description	Company ↑
D365 BASIC ISV	Dyn. 365 Basic I...	
IDPN PAYROLL NOW	Payroll NOW b...	
USPY PRIMO PAYDAY	Primo Payday	
→ [] ...		

Choose a value for Permission Set

12. Click on a blank row's ellipse, then search and select PN Additional

Permission Set Lookup

PN Additional

Permission Set ↑	Name	Extension Name
→ PN ADDITIONAL	PN Additional	

13. Once the Permission is displayed in the grid you may close the window, you are now setup!

A screenshot of the Microsoft Entra Application Card for "HR Next Connection". The card shows the "General" tab with fields for Client ID, Description, State, and Contact Information. Below this is the "User Permission Sets" section, which includes a table with permission sets. The "PN ADDITIONAL" row is highlighted with an orange border.
