PROCESS PROCEDURES

From Process Procedures you can add process procedures to the previously created 'Payroll Process Procedure Codes'. You can also click 'Set Active Payroll Codes' to assign the active payroll codes you would like to include or exclude to the payroll process procedure:

FLEXIBLE MED	1/1/2019		Actual Earnings	☐

PROCESS PROCEDURE ADVANCED FILTERS

With 'Process Procedure Advanced Filters' you are filtering earnings down (with the available filters) to a subset of earnings. That earnings subset would then be used in a process procedure calculation.

PROCESS PROCEDURE BRACKET TABLE

This is where you can build a custom bracket tax. For example, if you have a state tax that grows as the earnings grow, you could set that up in the process procedure bracket table. Basically, it gives you the ability to create your own bracketed tax table and then bring that into a process procedure.

PROCESS PROCEDURE RATES BY AGE TABLE

From here you can set a rate for an age range that can be pulled into a process procedure. The Age Table is typically used when setting up process procedures for Life Insurance.

CUSTOM EMPLOYEE AMOUNTS

Custom Employee Amounts is where you can put in an employee, a date, a payroll code and an amount. Then on the pay cycle that includes the date entered, the custom amount will be inserted into the designated employee payroll document.

SET ACTIVE PAYCODES

Some of the process procedure operations work in conjunction with the 'Active Payroll Codes' table that can be opened from the ribbon. The operation 'Header Calc. Earnings' will look to the Earnings Calculation in the header to know what type of earnings should be brought into the process procedure.
